

100,000 Homes Campaign Chicago: Database/Registry Committee

Purpose:

The goal of the Database/Registry Committee is to establish a system for data entry and use for Registry Week and to maintain systems integration moving forward. Members of the committee will maintain and update the information obtained by the Registry Week surveys as well as analyze it to understand how it interacts with other aspects of the campaign, such as the number of housing units needed. The Database/Registry Committee will compile and evaluate crucial information that will enable a new approach to housing the most vulnerable.

Tasks:

Members of the Database/Registry Committee will perform the following tasks at meetings:

- Understand the Quickbase database and how it works for the campaign
- Enter and maintain all data obtained before, during and after Registry Week
- Collaborate with Volunteer Recruitment Committee to secure data entry volunteers for Registry Week
- Analyze and interpret campaign data
- Discuss systems integration and how to integrate data into the system-wide effort as well as the future effort

Committee Members:
